

Learning with Westie

Maths

Students apply mental and written computation strategies. They work with fractions and decimals.

They investigate symmetry and compare areas. They represent money values in various ways and learn to count change.

English

Students read a story and analyse the language features. They create a new chapter.

When they read, they are working on fluency and inferring what the author means.

HASS

How can people use environments more sustainably?

Science

How do the properties of materials influence their selection for a purpose?

Technology

Students program robots to perform simple commands.

HPE

Skills refinement and their use in a modified game

Arts

Students read and write notes on the treble clef and play the recorder

Yr 3/4

Term 3
